

# Information Mosaic puts CAMA to the test in BISS Benchmarking

**London - 15 April 2008**

B.I.S.S. Research, the exclusive research company offering a unique benchmarking of services and systems in the financial services sector, today announced that Information Mosaic one of the industry's leading Corporate Actions systems specialists has entered CAMA into the B.I.S.S.2008 Benchmarking.

Gary Wright, C.E.O., B.I.S.S. Research and creator of the B.I.S.S. business benchmarking concept said "Information Mosaic have always been able to demonstrate the quality of CAMA through the benchmarking process. The continuously outstanding scores achieved by CAMA over the last five years is testament to its exceptional capability and the excellence of its development team. We are delighted to welcome Information Mosaic with CAMA into this years benchmarking, which adds to the limited list of top quality vendors already committed to prove their system in this increasingly tough examination. Given its performance in previous years we anticipate that CAMA will feature prominently in vying for the new award to recognise the highest scoring systems in Broker Dealer, Custody and Asset Management. This will be based on an aggregate score achieved by each system and a duly weighted calculation over the last five years."

John Byrne the CEO and founder of Information Mosaic said "The last five years of the B.I.S.S. benchmarking awards has fundamentally raised the standard of Corporate Actions solution offerings in the marketplace. 2008 should be no different where the level of talent and expertise of the judges has radically improved all aspects of Corporate Actions automation, of benefit to both vendors and the user community alike. We are delighted to be involved again this year and continue to commend the role of B.I.S.S who constantly evolve and expand the benchmarking evaluation. We are confident the panel will appreciate the investment Information Mosaic has made in the continuing adaption and update of CAMA™ functionality to ensure we have continued success in 2008 and beyond. We believe through CAMA™ we meet our single vision: to provide the best global solutions on a single, scalable platform".
